How to Make a Paper Boat

Materials: 8½-in. x 11-in. piece of paper and a pencil or pen. Other sizes in similar proportions (such as 9½-in. x 12-in., or 15½-in. x 20-in.) also will work. For best results don’t use newsprint, which will absorb water quickly.

Procedure
1. Lay the paper in front of you vertically on the table.

2. Fold the sheet of paper in half, bringing the top half over the bottom.

3. Now, fold the paper in half from left to right. Make a crease. Open the paper back up so that it looks like it did in Step 2.

4. With a pencil or pen, make a small dot at the top center of the paper.

5. Fold each of the top corners diagonally to the center crease.

6. Fold the bottom edges up on either side.

7. Slip your fingers inside the bottom and gently open—but not too far. Right now, you have a paper hat!
8. Turn the “hat” so that you are looking at it from the front, or “on edge.” Slip your fingers inside the bottom and continue to gently open the “hat” until it becomes a flat square. Neatly straighten any pieces that bulge out. Turn the square so that it looks like the picture below.

9. Fold the bottom edges up on either side to make a small triangle.

10. Turn the triangle so that you are looking at it from the front, or “on edge.” Slip your fingers inside the bottom and gently open until it becomes a flat square. Turn the flat square so that it looks like the picture below.

11. Hold the square by the top two edges. You should be able to see the dot you made on the top center point.

12. Gently pull the top two edges all the way out to each side. Flatten the paper. Slip your fingers inside the bottom and open it just a bit.

Now you have a boat, with a sail in the middle!

You may wish to color or decorate your boat, or add a toothpick flag. If you wish to make a smaller, sturdier boat, repeat steps 9 and 10 before going on to steps 11 and 12.
